### DETAILED ACTION

1. This application is a 371 of PCT/IB00/01382. A preliminary amendment has been filed. New claims 20-28 have been added. Claims 1-28 are in the case.

2. *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claims 7-8, 24-25 drawn to compounds wherein  $R^5$  and  $R^6$  are independent substituents. If this group is elected, a further election of a single disclosed species is also required. Generic claims 1-6, 9, 17-23, 26-28 reading on the elected compounds can be prosecuted together with the elected compounds.

**Group II**, claims 1-6, 9, 17-23, 26-28 drawn to compounds wherein  $R^5$  and  $R^6$  forms a ring. If this group is elected, a further election of a single disclosed species is also required.

Claims **10-16** are in nonstatutory "use" format which are withdrawn from consideration. Cancellation is recommended.

The inventions are distinct, each from the other because:

Groups I and II compounds are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1. In addition, each group of compounds further contains Markush alternatives directed to more than one species of the generic groups I or II. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1. Under PCT Administrative Instructions Annex B, section(f) "Markush Practice" paragraph (f)(i)(B)(2)(v) it was stated:

"When dealing with alternatives, if it can be shown that at least one Markush alternative is *not* novel over the prior art, the question of unity of invention shall be reconsidered by the examiner."

Art Unit: 1625

In the instant case, it is found that at least one Markush alternatives i.e. when  $R^5$  and  $R^6$  forms a ring is not novel, see Okamoto et al. CA 105:97950, RN 103891-80-1 anticipated group II compounds.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
